STONE™

STONE

Stone Hydraulic power units use components that ensure long life and quality which customers expect from a market leader.

compact power units

Stone offers one of the widest ranges of AC and DC power units in the industry. The power units are designed to solve a myriad of

application requirements. There are tens of millions of Stone units in service today, serving markets around the globe.

Stone provides collaborative engineered solutions for whatever challenge your application presents.

Pumps

- From .08cc to 8cc
- Hi-Lo Pump Sets using any combination
- External ported pumps for motor-pump units

Motors

- 12/24 VDC Motors
- Continuous Permanent Magnet Motors
- 240/415 VAC motors
- Vane Air Motors

Tanks

- From 2-50 Litre capacities
- Plastic or Steel
- Vertical or Horizontal
- Custom Built Tanks

Hand Controls

- Single & Double Acting Pendant Controls
- Wireless Remote Controls

Valves

- Simple Lowering Valves
- Solenoid Sandwich Valves - Stackable
- Manual Sandwich Valves - Stackable
- Cetop 3 Options

Other Options

- Return Flow Controls
- Motor Pump Units
- Relief Valve Spring Selection
- Heavy Duty Start Solenoid
- Reversible Units
- Wiring Looms & Enclosures

handy hydraulic hint

Oil Temperature should be kept to the lowest practical temperature for top efficiency and service life. At high temperatures, oxidation of the oil is accelerated, shortening its useful life by producing acids and sludge which corrode metal parts, clog valve orifices, and cause rapid wear of moving parts.
