## **GLOBE Piston Air Motors Valves on GLOBE Vane Motors**

Ever had an application that would be best serviced with a Globe Vane Motor fitted with a piston air motor control valve? PT Hydraulics Australia have a new range of adaptors which will allow Globe Piston Air Motor Valves, manual or pilot operated, to be added to Globe Vane Motors. These can be used in tandem with the BN Brakes fitted to a vane motor. For more information on the new range of fittings and possible applications please contact PT Hydraulics Head Office or your Regional Sales Manager.

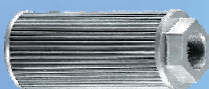

## **New ATO Power Units** HYDRAULIC POWER

PT Hydraulics Australia's ATO Program is proving to be a great success. The latest ATO power unit built by PT Hydraulics is a 200 Bar, 4-way, Synchronous Lift Power Pack.

Features Include:

- 4 way flow control via a geared flow divider giving equal flow from the 4 ports.
- 240 volt AC motor complete with pendant and power lead.
- Single 4w/3p Cetop valve for lift and lower functions.
- Relief on all 4 ports.

### handy hydraulic hint

Keeping tabs on the performance of filters is essential to machinery reliability. Always slightly oversize your filters to reduce fatigue caused by high flow density, cold starts and surge-flow conditions.
