PT Hydraulics Australia has more new products...

PT Hydraulics Australia is excited to continue adding new products to our extensive existing range. This simply means that PT Hydraulics can now service your needs better and deliver a wider range of quality products.

New Products arriving soon include:

Series Manifolds: 1 - 4 Station

Bell Housings: D80 - D160 SAE "A" "B" "C" Mounts
 Petrol Motors to Din Pumps
 (Couplings included)

Heat Exchangers: Small DC Powered

High Pressure Filters: 25 - 110 Lpm

Elements 3/6/10/25um absolute

application: **GLOBE AIR MOTORS** Powered Hose Reel

AME Pty Ltd an engineering, project management and construction company based in W.A., have designed and fabricated a Globe Piston Air Motor driven hose reel to support grouting, flow-line and hydro testing operations.

The drive system consists of a Globe Piston Air Motor, available from PT Hydraulics Australia, high speed fail-safe brake and shaft mounted planetary gear reducer with torque arm. This robust system is safe, simple and easy to maintain in the field.

Multiple hoses with varied minimum bend radii can be stored on the reel through the installation and removal of circumferential drum struts.

For more information on Globe Piston Air Motors and other applications please contact PT Hydraulics Australia or your Regional Sales Manager.

GLOBE AIR MOTORS handy hydraulic hint

In order to get the maximum life out of your Globe Air Motor ensure clean dry and lubricated air is supplied to the motor at all times - contact us to get information on quality filter lubricators.
