products from...

In November 2008 we introduced a new product range from Youli. Youli Hydraulic International specialise in Monoblock and Sectional Directional Control valves. Following the success of previously introduced products we are pleased to be expanding the range of monoblock options available.

We now offer a 4 Way 3 Position Solenoid/Manual Combination (8ESN) and a 4 Way 3 Position Solenoid (8ES3). Also on board we have new Youli Micro-switches, similar to that of the mini-pro, these switches activate your power unit when the valve position moves.

Micro-Switches

Coil Operated 8ES3

Hydraulic Motor Brakes

We now also offer a new Hydraulic Motor Brake for BMR & BMT series Motors. The ZDO2 is a wet disc hydraulic brake using a spring to apply the brake and hydraulic pressure to release. The ZDO2 Brakes exhibit the following impressive features:

- Suitable for a range of applications
- 4 Drainage Taps
- Quiet operation, reliable and durable – due to advanced friction and spring design
- Easily assembled
- Suitable for flange attachment to BMP, BMR Series Motor

handy hydraulic hint

Oil Temperature should be kept to the lowest practical temperature for top efficiency and service life. At high temperatures, oxidation of the oil is accelerated, shortening its useful life by producing acids and sludge which corrode metal parts, clog valve orifices, and cause rapid wear of moving parts.
