product feature

Hydraulic Power Units

in mines

Recently PT Hydraulics has developed a range of Hydraulic Power Units suitable for a number of underground mining applications. These units have ranged from 5kw to 23kw for many applications particularly in the coal mining industry. The units are air-motor driven, have steel manifolds and full plastic return filters complying to mine regulations having no aluminium components exposed.

For more information contact Daryl Cook at PT Hydraulics Head Office on 03 9562 8800
