STONE™

STONE™ APU units

GLOBE
AIR MOTORS

hydraulic power that's safe, compact & reliable

Stones Auxiliary Power Units (APU's) power packs operate at up to 3000 PSI and provide any system with a reliable source of backup hydraulic power. APU power packs have the ability to be integrated with existing reservoir and valve systems to provide a reliable and safe emergency operation of any function. Installation is simple due to each unit comprising relief and load check valves.

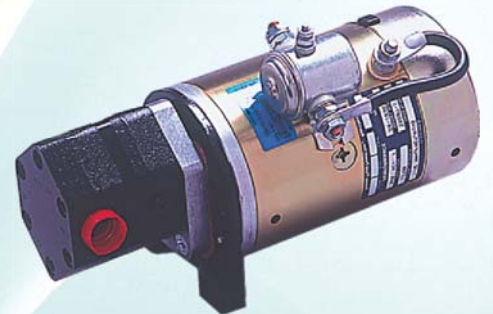

GLOBE AIR MOTORS s.v.

A range of AC, DC and air driven motors are available, along with an integral solenoid release for single acting circuits, making the Stone APU power packs one of the most versatile products of its kind in the market.

ARGO
HYTOS

Motor options include:

- Single phase & three phase AC power rating up to 4kW
- Standard duty, extended duty and heavy duty - 12 or 24 volt DC motors
- Vane Air Motors up to 2.1kW

NEW PRODUCTS

hand pump & tank to suit

Just a reminder that we have new products on their way, available early July. As featured in last months newsletter, we have added a new double acting hand pump and steel tank suitable for a range of applications in industrial, agricultural and transport fields.

handy hydraulic hint

Air should be kept out of a hydraulic system at all costs. Ensure airtight joints in any sub-atmospheric zone or pump inlet lines. Also make sure that those lines and all return/drain lines terminate below the minimum fluid level in the reservoir; pump inlet lines should be sufficiently below to prevent air entering through a vortex at low fluid levels.
