Pancake Cylinders

Power Teams new Pancake Cylinders, with locking collar, are specifically designed to lift where accessibility is limited. These single acting, load return cylinders range from 55T to 620T and offer an answer to a range of industrial applications. The locking collar is designed to support a lifted load for an extended period of time without hydraulic pressure being required.

To help prevent the detrimental effects and lack of performance as a result of side loading, the Power Team Pancake Cylinder has an integral tilt saddle and hardened swivel cap as standard. The rams also feature an overflow port, "weep hole", which prevents the piston from being overextended under load. Furthermore, all Power Team Pancake Cylinders are coated with a special coating reducing the effects of corrosion and abrasions allowing them to be used in the harshest of environments.

Unlike traditional pancakes

Pancake Cylinders
lift weight rather
than put it on!

Industrial Workshop Presses

Right now at PT Hydraulics Australia **at PT Hydraulics...**
we have an extensive range of Industrial Workshop Presses in stock.
With the 30% Capital Expenditure Rebate ending June 30 now is a good time to pick up or sell a new Press.

handy hydraulic hint

All Hydraulic Cylinders should always be stored in a vertical position with the rod end down in a DRY, well protected area. This will ensure no moisture seeps into the cylinder causing rust and other damage.
