

## PT Hydraulics Presents Predator Torque Wrench Range

### TWSD Series Torque Wrench

- Superior torsion strength
- Compact frame is 2/3<sup>rd</sup> the size of aluminum wrenches
- 30° rotation per cycle
- Comparable weight to aluminum wrenches
- Up to 40% Faster
- 25% Less Parts
- Multi -Axis Swivel Manifold
- Safety Relief

The Predator Series of torque wrenches includes both Square Drive (capacities up to 24,700 ft. lbs./ 33,500 Nm) and Low Clearance wrenches (capacities up to 29,000 ft. lbs./ 39,000 Nm). The steel body design provides a compact tool that can be used in the most inaccessible bolting areas found in the industry. Each component on the tools has been optimized to minimize weight without sacrificing strength and durability, using steel alloy, high strength titanium and aluminum. Tools utilize a high grade nickel plated finish, making them suitable for sub-sea application in a salt water environment.

### TWLC Series Torque Wrench

- More Compact
- Fit more applications
- Simple Construction
- Less Complicated
- Fewer components
- Faster operation
- No anti wind up devices
- Internal Safety valve
- Plated finish
