PT Hydraulics Australia presents...

TWP55-COOL

Pump

To combat overheating due to severe operating conditions Power Team has released a torque wrench pump that includes a built in cooler.

The new model is based on the TWP55 pump which has been sold in Australia for many years with great success. The reason for the success of these pumps is due to Power Team's famous 55 series pump which is used world wide in the bolting and stressing industries.

Power Team is a manufacturer and supplier of major OEM companies in the bolting industry. All pumps are fully backed by a marathon lifetime warranty giving the user confidence when using the pump.

With little advertising these TWP55COOL pumps are already selling well with stock consistently on order to keep up with demands.

For more information please contact PT Hydraulics Head Office or your Regional Sales Manager.

PT503M

Metric Catalogue

PT Hydraulics is pleased to announce the new and improved Power Team Catalogue will be available in July. PT503M is a metric catalogue containing all the previous quality Power Team tools and equipment as well as exciting new editions such as the Predator Torque Wrench and Pump Range, High Pressure Pumps (35,000 PSI) and new High Tonnage Cylinders.

To place your order for the new PT503M Catalogue, please contact your Regional Sales Manager.
