Hydraulic Presses

The Power Team 100T Roll Bed Press just keeps on pressing...

Power Team offer a wide range of single and double acting presses including Shop Presses, Open Throat Presses and Roll Bed Presses. The impressive range is available from 10T-200T capacities and provides a market leading quality product that is built to last.

This was made no more evident when a 100T Roll Bed Press (RB10013) recently required some minor maintenance. Upon inspection the press was found to have been manufactured in 1982. After being in service for over 25 years the press merely required a new batch of oil and some replacement seals for the 100T Cylinder. The press is back in use and no doubt with the proper maintenance will have a long life ahead of it!

accessories

Furthermore, your Power Team Press can be made even more versatile with the use of a Press Accessory Kit. Having one of these sets will eliminate unsafe makeshift set-ups and many of the items can be used with pullers that you may already have. Press Accessory Kits include such items as V-Throat Press Plate, V Blocks, Threaded Adapter and Pushing & V-Pushing Adapters. Sets are available ranging from 10T through to 200T and all accessories can be purchased as single items.

For more information on Power Teams Presses, their applications and Power Team Press Accessory Kits please contact PT Hydraulics Head Office or your Regional Sales Manager.

handy hydraulic hint

To ensure operator safety, always use a Power Team Protective Blanket to protect against broken or flying parts in a force pressing application. The clear protective blanket wraps easily around the press job protecting the operator whilst being clear enables the job to be visually monitored ensuring a much safer work environment.
