

WHAT'S NEW IN FPP ?

PT Hydraulics Australia now offers...

ARGO
HYTOS

hand pump

We are pleased to announce the release of a new Italian made hand pump for use on the Stone Packs. The new AMF-HP2 Sandwich hand pump eliminates the use of the Stone hand pump under the manifold, which in turn eliminates the possibility of leakage when the unit is under pressure.

This new item joins PT Hydraulics' pressure relief, pressure reducing and flow control sub plates which have also been added recently. The AMF-HP2 has a list price of \$310.00 and is a more cost effective hand pump for the Stone Packs when Hytos Sandwich Valves are also being used.
