

CONDITION MONITORING PRODUCTS

PT Hydraulics Australia offers a wide range of condition monitoring products enabling you to monitor any given parameter of condition in your machinery.

As well as reducing maintenance and servicing costs, efficient fluid management is also a key factor in boosting the reliability, productivity and cost-effectiveness of the operation. Systems that provide reliable assessment of the condition of hydraulic fluids are the key feature of continuous fluid monitoring.

Sensors and measurement technology from ARGO-HYTOS precisely target this range of tasks. Our fluid monitoring products comprise equipment and system solutions to enable online monitoring during continuous operation as well as analysis of bottled samples under laboratory conditions.

- portable oil diagnostic system
- stationary particle monitor
- software to evaluate data and analyze trends
