

FILTRATION SYSTEMS

FLUID POWER COMPONENTS

PT Hydraulics have a large range of Filtration Products we utilise to build customised Offline Filtration Units

Utilising Argo and Donaldson product PT can build a filter unit for filtering a range of fluids from the smallest tank to a large bulk oil or fuel facility.

Units are designed to meet customer needs and can be Pneumatically or Electrically driven. The size and amount of filters will be applied to get the desired result.

Utilise our Request For Quote (RFQ) sheet to supply the information we need to design a unit that is right for your application.
