540 (medical to industrial):

1 oxygen regulator CGA 540

1 Search and rescue cart

Price \$2850

**Oxygen cylinder is not included**

The Search and Rescue Cutting System (SAR) is an absolute necessity for any USAR team, rescue vehicle or cutting professional. The unit was engineered from the ground up to be the most efficient, complete and reliable steel cutting system available.

Fully loaded the cart weighs 120 lbs. and measures 41"x18"x18". It holds a standard 80 cubic foot oxygen bottle, which gives over 1 hour of cutting 1/4" steel and 20 minutes of 4" steel. The SAR uses the same 1.5-quart gasoline container as our Portable Cutting System (PCS), providing 1.5 hours of cutting time for fuel.

Petrogen's SAR System and all our products are manufactured and assembled in the United States. We spare no effort in making it the finest tool of its kind.
